

# OptiScan

## sensors

**OptiScan H-Class/HR**  
High Resolution sensor for very accurate scanning

**OptiScan H-Class**  
All-purpose standard sensor for high speed scanning

**OptiScan S/SD-Class**  
Extended distance of working for in-process inspection

**OptiScan R-Class**  
Extended field of view for in-process inspection

## systems

**CMM**

**MovilScan**

**Robot**

**In process inspection**

**Inspection automation engineering**

# OptiScan

## solutions

### Manufacturing Quality Solutions (MQS)

#### **RE (Reverse Engineering)**

Helping designers and engineers reduce new product development time and improving innovation cycles

#### **RPV (Rapid Product Verification)**

Reducing time and cost of "ramp-up" and "set-up" of the manufacturing process

#### **IPA (Inspection Process Automation)**

Assuring and increasing the product quality

#### **PSA Manufacturing and Assembly (Process Stability Assurance)**

Assuring process stability by control of the product and the tools.

#### **RPP (Robot Path Programming)**

Improving movement and programming of robot / tools

#### **OEM Tools and API Software libraries for OEM partners**

Tools and API Software libraries for OEM partners:  
Improving innovation by 3D scanning in your machine  
and software product development

## results

+ productivity  
+ quality  
- cost

---

= your Benefits

**DATAPIXEL S.L.**
